EDUCATION

City College of New York (CCNY), City University of New York (CUNY)

New York, NY

Bachelor of Science in Computer Science

Graduated: May 2025

Relevant Coursework: Algorithms, Database Fundamentals, Data Structures, Software Engineering, Computer Architecture, Computer Networks

RELEVANT EXPERIENCE

Belle Lyric Music

Los Angeles, LA (Remote)

Software Engineer Consultant (Part-time)

October 2025 - Present

- Developed a digital lyrics catalog platform to migrate manually maintained data into a database-driven system
- Implemented automated data workflows to improve data integrity and cut manual processing time by 40%
- Built iterative prototypes emphasizing modular design principles, system scalability, and cross-tool data integration

CUNY Tech Prep

New York, NY

Software Developer Fellow (Part-time)

Aug 2024 – May 2025

- Built full-stack CRUD apps using React, Node.js, and Supabase, while also utilizing MVC & Git workflows
- Developed a habit tracker leveraging OpenAI LLM to deliver personalized coaching and contextual insights
- Increased engagement for 50+ users by 40% through heatmap visualizations and real-time progress analysis

IQSpatial

New York, NY (Remote)

Software Engineer Intern

Jun 2024 – Aug 2024

- Automated backend pipelines to serve real-time GeoJSON APIs using Python, Flask, and spatial data processing tools
- Develop a document analysis platform for business intelligence analysts using Python, JS, and React
- Reduced manual document searches by 60% by developing an AI-powered keyword finder tool for internal data retrieval

PROJECTS

[ElGrupos](#) | *React 19, TypeScript, Vite, TailwindCSS, Chrome Extensions API*

- Developed a Chrome extension to organize and share browser tab groups with real-time sync and visual color-coded management
- Built a modern React UI with import/export, keyboard shortcuts, and Chrome API integration for seamless user productivity

[Aspire](#) | *React, Node JS, Supabase, OpenAI API*

- Built a conversational AI platform using OpenAI Function Calling for dynamic goal tracking and habit planning.
- Designed a full-stack system with Supabase for real-time sync and React + Tailwind for adaptive, chat-based interactions.
- Refined dialogue workflows through user feedback, improving response coherence and engagement by ~25%.

[Alr](#) | *Python, scikit-learn, React Native*

- Worked with a team to build a mobile app assisting individuals in tracking and predicting asthma attacks
- Enabled personalized risk assessments using a machine learning model to analyze live environmental data
- Engineered the backend with Firebase for user authentication and data synchronization across devices

SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, C, C++, Bash

Frameworks & Libraries: Node.js, Express, React, Flask, FastAPI, scikit-learn, Pandas, LangChain

Tools: Git, Linux, SQL, NoSQL, Google Cloud Platform, BigQuery, Firebase, Docker, Postman

Concepts: Fullstack Development, Backend Development, Frontend Development, REST API, System Design, Software Design, Microservices Architecture, Machine Learning, CI/CD, Agile, Automation
